To Whom It May Concern;

I am a Drilling Consultant involved in drilling directional and horizontal wells for numerous Canadian and International Oil Companies.

I originally owned the PathTracker 5 software as well as 2 additional competitor's directional drilling software package. Not being very satisfied with either software package I discovered that PathTracker V6 was near release which I purchased.

- ✓ **User friendly**
- ✓ **Reliability – does not freeze or crash my system**
- ✓ **Trustworthy / accurate**
- ✓ **Ability to view or manipulate multiple wells simultaneously**
- ✓ **Path Proximity feature**
- ✓ **Numerous graph options**
- ✓ **PathTracker's approachable attitude regarding recommendations to add program elements.**
- ✓ **Extremely rapid development of upgraded versions**
- ✓ **On the rare occasion that tech / customer support was required the response was immediate.**
- ✓ **Price – very reasonable to comparable or inferior programs**

All things considered this is very professional product which I highly recommend.

Best Regards,

A handwritten signature in blue ink, appearing to read 'John Arkossy'. The signature is fluid and cursive, with a large initial 'J'.

John Arkossy.
